Data are current as of 10:00 am on 8/5/2020; For populations <50,000, <5 cases are reported as such or suppressed for confidentiality purposes.

¹Previous reports documented the number of persons tested. This report represents to the total number of tests performed

²Percent change represents the difference in case counts (over the last 14 days) as of today (8/5/2020) as compared to the fourteen days preceding 7/29/2020.

³Address information for these cases are currently being obtained.

Bureau of Infectious Disease and Laboratory Sciences calculates rates per 100,000 population using denominators estimated by the University of Massachusetts Donahue Institute using a modified Hamilton-Perry model (Strate S, et al. Small Area Population Estimates for 2011 through 2020, report published Oct 2016.)

Please note: Data for these tables are based on information available in the DPH surveillance database at a single point in time. Case counts for specific cities and towns change throughout the day as data cleaning occurs (removal of duplicate reports within the system) and new demographic information (assigning cases to their city or town of residence) is obtained.

Notes

- (1) Massachusetts is divided into five geographical EMS regions. For more information, please see <https://www.mass.gov/service-details/ems-regions-in-massachusetts>.
- (2) Cases per 100,000 for each EMS region are calculated as the number of positive tests within a region divided by that region's population multiplied by 100,000.
- (3) Data source: MAVEN and Umass Donahue Institute Population Estimates.
- (4) Congregate care testing surveillance guidance requires facilities to take different action if their regional transmission is above or below 40 new cases per 100,000 residents.

*Staff and residents; **Cumulative COVID-19 deaths –includes residents only. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy. Sources: MAVEN for confirmed cases; Individual facilities reported resident deaths to DPH Bureau of Health Care Safety and Quality's Health Care Facility Reporting System

*Staff and residents; **Cumulative COVID-19 deaths –includes residents only. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy. *Staff and residents; **Cumulative COVID-19 deaths –includes residents only. PLEASE NOTE: This list includes nursing homes, rest homes, and skilled nursing facilities; reported COVID-19 cases to date represent both staff and residents. The number of cases for a facility relies on the amount of testing conducted; facilities not included on this list may have COVID-19 cases that have not yet been identified. As of May 25th 344 nursing homes reported that at least 90% of staff and 90% of residents had been tested. ALSO: Data on deaths is self-reported by each facility. In accordance with long-term care regulations, nursing homes and rest homes must report deaths due to any cause in any resident, either confirmed COVID-19 positive, or suspected to have COVID-19, even if the individual was never tested. When the number of deaths is between 1-4 residents, the number is suppressed and reported as 1-4, to protect possible resident identification. The Department of Public Health performs routine data quality reviews of the data it receives. This includes removing duplicate results and updating counts if needed. Also, occasional negative tests from nursing home residents result after being reported first as presumptive and are removed. As a result of this, the total of self-reported deaths may decrease to ensure accuracy. Long-Term Care Staff Surveillance Testing

- On June 30, the Commonwealth issued an evidence-based surveillance testing policy for long-term care facilities to further support the safe care of vulnerable residents in these settings
- Nursing facilities and rest homes are required to comply with the surveillance testing regimen, and may be subject to financial sanctions for non-compliance**
- To determine the cadence of surveillance testing, nursing facilities and rest homes were required to perform baseline testing of at least 90% of staff by July 19th
- Based on these results, facilities were required to adhere to a surveillance testing regimen:
 - If there are COVID+ cases, the facility must test all staff weekly until there are no new cases for two weeks**
 - If there are no COVID+ cases, the facility must either test all staff, or 30% of staff, bi-weekly, depending on the transmission rates in the facility's EMS region (included in this report)**
- This report includes information on what staff surveillance testing regimen each facility is required to adhere to, and the percentage of staff tested during the latest complete testing period*
- The state is supporting surveillance testing costs for nursing facilities and rest homes through September, at which point EOHHS will reassess the testing policy based on public health metrics

Testing Results (through 7/30)	Total facilities required to submit testing data	429
	In Compliance (<i>Total facilities attesting to achieving testing threshold</i>)	113
	Not In Compliance (<i>Total facilities not achieving 90% staff testing threshold</i>)	8
	Did Not Report (<i>Total facilities that did not submit testing data</i>)	30
	In progress (<i>Total facilities that are currently in week 1 of a biweekly reporting period</i>)	278

* Note: for facilities on a bi-weekly regimen, this report will reflect the percentage of staff testing during baseline testing

Nursing Facilities Clinical Audits

- On, April 27th the Commonwealth announced a COVID-19 Nursing Facility Accountability and Support Program. The program is predicated on clinical audits every two weeks **based on a [28-point Infection Control Checklist](#)**.
- The 28 point infection control checklist was developed in accordance federal and state guidelines. Audits are completed by licensed nurses and clinical staff trained in infection control.
- The bi-weekly report depicts how each facility has scored on their audits.**
- Based on a facility's score on the 28-point checklist, each facility is rated:
 - 1) Green "In Adherence" and scored at least a 24 out of 28
 - 2) Yellow "In Adherence but warrants reinspection" and scored at least 20 out of 28
 - 3) Red "Not in Adherence" and scored under 20 and/or **missed at least one of six core competencies**
- All facilities have been audited *at least* twice
- While this is the fourth and final round of audits under the Accountability and Supports program, **Massachusetts will continue to regularly survey and audit nursing homes to ensure compliance with infection control and quality standards**

Audit Results (through 6/30)			Round 1	Round 2	Round 3	Round 4
			360	230	243	172
	Total audits completed		360	230	243	172
	Total facilities in adherence		228	180	221	152
	Total facilities in adherence but warrant reinspection		0	1	1	0
	Total facilities not in adherence					
	- Facilities with score >20 but missed core competency		119	49	21	20
	- Facilities with score <20		13	0	0	0
	Percentage of facilities not in adherence		37%	14%	6%	6%

* Round 4 audits were conducted at facilities that (1) are found to be "Not in Adherence" or "In Adherence but Warrants Reinspection" in Round 2 (2) have **historic infection control or quality issues**, and/or (3) are randomly selected for an audit

Data Source: Self-Reported Data from ALRs to Office of Elder Affairs; * Includes staff and residents; Note: This list includes all Assisted Living Residences and their reported COVID-19 cases to date (staff and residents). The number of cases for a facility relies on the amount of testing conducted; facilities not included on this may have COVID-19 cases that have not yet been identified. Some facilities have tested some or all residents only; some have also tested staff. A low number of cases may reflect that not all residents and staff have not been tested, not necessarily low prevalence

Data Source: Self-Reported Data from ALRs to Office of Elder Affairs; * Includes staff and residents; Note: This list includes all Assisted Living Residences and their reported COVID-19 cases to date (staff and residents). The number of cases for a facility relies on the amount of testing conducted; facilities not included on this may have COVID-19 cases that have not yet been identified. Some facilities have tested some or all residents only; some have also tested staff. A low number of cases may reflect that not all residents and staff have not been tested, not necessarily low prevalence
